Case Study – An Oman oil refinery and petroleum industry

In Vehicle Monitoring System

Objective
• Driver Safety
• To monitor driver’s driving behavior

Solution
We implemented In Vehicle Monitoring System, a comprehensive web-based tracking, and monitoring system. By using this solution, the company is able to track
• Continuous driver’s driving behavior
• Driver – Red Amber, Green Score – Analysis
• Provides driver utilization/performance report

Value Delivered
• Reduction of accidents by 20%
• Improved driver safety and behavior
• Zero Red Score Drivers
• Improved driver safety, driver behavior & safety levels
• Better asset efficiency
• Improved Asset Maintenance.
• Real-time tracking to pinpoint the exact, current location of vehicles and staff

One of Oman’s largest companies and is one of the most rapidly growing businesses in the Middle East’s oil industry.
